FRONT-END DEVELOPER

PROFILE

I am a self taught front-end developer who lives and breathes code. I spend most of my days learning the most fundamental aspects of web development. I utilize the latest technologies available in the industry to create beautiful websites that can be used by all sorts of businesses. I would love to show you the projects that I have been arduously been working. They can be found below this section.

EXPERIENCE WEB DEVELOPMENT

Front-End Projects

- **Portfolio (React/ Javascript /Sass)** : This website highlights all the projects I have arduously worked on for the past few months. Click the link to discover more: (<http://alexandergovea.com>).
- **The Movie Bonanza (React/ Redux/Redux-Thunk/ SASS/ The Movie DB API/ React-Router/)** : **React Application that fetches data through a third party API. Designed to provide an amazing user experience and allow users to search for their favorite movies.** (<https://moviebonanzadb.com>).
- **Nexter (React/ SASS/ Local Data/ React-Router)**: **This application was made to simulate the functionalities of websites such as zillow, as it allows you to sort by price, location, and add-ons.** You can also login to discover more features. (realestatenextor.com)
- **The Steak House (React/ Sass)** : Aesthetically pleasing single page Webapp . This high fidelity website can be used by a local restaurant looking to attract new costumers and increase their revenue. (<http://realestatenextor.com>)

TECHNOLOGIES

- React, Redux. Javascript. React-Router, Redux-Thunk.
- HTML, CSS, SCSS, Materialize, MaterialUI, SemanticUI, Bootstrap.
